

Groundwater Monitoring Well Installation Along E. Jewell Ave.

Brown Group Retail, Inc.'s environmental consultant, EnviroGroup, will begin installing 20 to 25 additional groundwater monitoring wells in the neighborhood on September 4, 2007. The purpose of the wells is to gather data to further characterize groundwater flow in underlying bedrock as part of ongoing groundwater remediation. Wells will be installed on E. Jewell Ave. between S. Ivy St. and S. Kearney St.; S. Kearney St.; S. Jasmine St.; and S. Jersey Way. Well installation will begin September 4 and continue through mid-October.

During well drilling and installation, parking signs and traffic cones will be placed around active work zones. EnviroGroup will work directly with neighbors to minimize parking impacts. Impact to traffic is anticipated to be minimal and streets will not be closed or blocked. Work is scheduled to occur between approximately 7:30 a.m. and 4:30 p.m. each weekday.

Once installed, the wells will be sampled and used to conduct tracer tests to assess groundwater flow through the underlying bedrock.

As always, we appreciate your patience and cooperation. Should you have any questions or require any further information, please contact either Garry Stanley or Eric Lovenduski at EnviroGroup at 303-790-1340.
